Thanks to its unsurpassed resistance to rips, tears, impacts and punctures, Fenner Dunlop's NovaCore® conveyor belt carcass offers top-notch performance at a low total cost of ownership. Boost NovaCore's performance with Giant XE®, our new premium cover compound for a state-of-the-art belt carcass. Developed to work in tandem with NovaCore, Giant XE is specially designed for dry, dusty environments and highly abrasive applications.

FENNER DUNLOP
NOVACORE
FABRIC CONVEYOR BELT

Features & Benefits:

Convey bulk materials faster and more reliably with this advanced, flexible belt carcass.

- ▶ Technologically advanced and patented Crimped Warp belt-fabric design
- ▶ The unique fabric weave allows for exceptional mechanical fastener retention
- ▶ Allows for smaller diameter pulleys throughout the conveyor system as well as superior troughability, tracking and load support
- ▶ Available in 300, 400 and 600 PIW constructions

Giant XE®

Features & Benefits:

A new premium cover compound for a multitude of challenging environments and conveyor applications.

- ▶ Ideal for heavy, abrasive materials
- ▶ High durability design offers resistance to dedusting agents and hygroscopic materials
- ▶ Premium Grade 1 ARPM standard
- ▶ Din Abrasion 70mm³
- ▶ -40° F to 200° F operating temperature
