

LogMaster® *Your Best Defense*

Conveying logs? Put your trust in Fenner Dunlop!

LogMaster handles persistent impact, cutting and gouging problems when conveying wood products day in and day out. Fenner Dunlop offers **LogMaster III** (3-ply) and **LogMaster IV** (4-ply) wood handling conveyor belts engineered to be your solution to the most severe conveying challenges. Our specially formulated cover compounds maximize belt life and lower your cost per ton conveyed.

Applications:

- **Slasher decks**
- **Log drops**
- **Debarkers in and out feeds**
- **Chipper in feeds**
- **Drum discharge**

Reasons to Count on LogMaster

- Specially engineered carcass construction for enhanced crosswise rigidity
- Increased skim gauges enhance energy absorption and belt resilience
- Superior impact and tear resistance
- Improved adhesion levels protects against heavy impact, trapped material and edge damage
- Matchless®, MOR and Duroslide® cover compounds are your best defense against cutting, gouging and oil saturation
- Minimum pulley diameters - 16" for LogMaster III and 18" for LogMaster IV

Standard Offerings:

- **Available Top Cover Compounds**
 - Matchless (RMA Grade I)
 - MOR (Moderate Oil Resistance)
- **Top Cover Gauges**
 - 3/8
 - 1/4
 - 3/16
 - 5/32
- **Bottom Covers**
 - Duroslide (.30 coefficient of friction)
 - Bareback (.18 coefficient of friction)
