

STANDARD LINE SERIES

Over time, the **Fenner Standard Line Series** has proven to meet all belt cleaning needs. The rugged construction and standard stainless steel hardware equals longer lasting cleaning in the most abusive conditions.

Angle Plow

The **Angle Plow** is designed for applications that can be used in all industries through heavy mining. These applications would include but are not exclusive to: underground mines, heavy industrial, power plants and cement plants.

Belt Width Inches	Blade Coverage Inches	Replacement Blade Part Number	Angle Plow Assembly Part Number
30	40	ABL-30-1	A-30-S
36	48	ABL-36-1	A-36-S
42	54	ABL-42-1	A-42-S
48	62	ABL-48-1	A-48-S
54	69	ABL-54-1	A-54-S
60	76	ABL-60-1	A-60-S
72	91	ABL-72-1	A-72-S
84	105	ABL-84-1	A-84-S

Features of the **Angle Plow**:

- Designed to divert material from either side of conveyor belt
- Mounted on return side of the belt before the tail pulley
- Top quality 8" high urethane blade that can be flipped for 3" of wear on both sides
- Double-sided urethane blade extends blade life and further protects the belt and tail pulley
- Stainless steel hardware throughout
- Available with or without tensioning devices

Ideally mounts at a 33° angle, although it is adjustable to suit your application
