

STANDARD LINE SERIES

Over time, the **Fenner Standard Line Series** has proven to meet all belt cleaning needs. The rugged construction and standard stainless steel hardware equals longer lasting cleaning in the most abusive conditions.

Conventional V-Plow

The **Conventional V-Plow** is designed to remove refuse material from the return side of the conveyor belt.

| Belt Width Inches | Conventional V-Plow Assembly Part Number | Replacement Blade 1 Part Number | Replacement Blade 2 Part Number |
|-------------------|------------------------------------------|---------------------------------|---------------------------------|
| 24 | CSVPC-24 | VPBL23-1 | VPBL22-1 |
| 30 | CSVPC-30 | VPBL27-1 | VPBL26-1 |
| 36 | CSVPC-36 | VPBL31-1 | VPBL30-1 |
| 42 | CSVPC-42 | VPBL35-1 | VPBL34-1 |
| 48 | CSVPC-48 | VPBL39-1 | VPBL38-1 |
| 54 | CSVPC-54 | VPBL44-1 | VPBL43-1 |
| 60 | CSVPC-60 | VPBL52-1 | VPBL51-1 |
| 72 | CSVPC-72 | VPBL56-1 | VPBL55-1 |

Features of the **Conventional V-Plow**:

- High quality urethane blades assures long life
- Double sided blades can be flipped over for 3" of wear on both sides
- Two-sided blades can be flipped over to further protect belt and pulley
- All stainless steel hardware
- Heavy safety chains prevent damage from use beyond life of the blade
- 1 1/8" steel road allows the plow to move up and down
